GERMAN PEACE CAMPAIGN.

"SIGNS OF INTERNATIONAL HATREDS DECREASING."

August 10, 2,25 p.m. Apparently a German press campaign with a view to peace has begun. The Hon. Sir Robert L. Borden, G.C.M.G., Premier of Canada, on receiving the freedom of the city of Bristol, predicted that the Dominion contingents fighting in comradeship in France and the Dardanelles would tend to create imperial unity in the future. His paid a warm tribute to the successes of Ber and Biton in South-West Africa, and said he would take back to Cauala an expression of the strong determination to struggle without ceasing till the war was brought to an honourable and triumphant issue (loud cheers); The Dominion would give their best in the cause of the Empire and of liberty (cheers).

Our Russian Allica B During the year's war there has been a growing feeling of admiration for our Russian allies, & feeling not only shared by her friends but sleo scknowleged by ber nemies. It is true there have been occasions when the situation on the eastern front bas been regarded with serious misgivings. But, however critical the position. Russia has hitherto seemed to pull through, and out minds have been set at rest by news of the successful strategy. At the present time the Tolicy of Russia might described, to use a boxing term, as "milling on the retrest." In taking Warsaw the Germans have lost thousands of men, and after this pitiful and wicked waste of life the finds a deserted city. with everything that might be of milijary value removed. So. thorough and systematic had been the evacuation that even telegraph and telephone wires, church belle, and machinery were taken away. To avoid a repetition of events in Belgium, all art tressures have. been sent to Moscow. These measures may seem quite natural and surely they absolutely condemn German methods of war-

Daily Press.

The Political Crisis in Japan, The Fruence Minister's problem is where to find the money for this expansion scheme, especially in view of the financial situation created by the war in Europe. Japan has a heavy burden of debt and is paying interest on foreign loans amounting to about a million yen a year and redeeming at the same rate. It is recognised that the financial conditions created by the war in Europe will make the renewal of the foreign kans as they mature practically impossible, and the task of the Ministry of Finance therefore is manifestly one of extracrdinary difficulty when the demands for naval and military expansion are being strongly pressed. That the Minister of the Navy as well as the Minister of Finance should have resigned from the Cabinet makes it difficult to form any idea as to the inture position of this question, but these resignscertainly suggest that the problem. of finding more money for the Navy has had as much to do with the wrecking of the Ministry as the britery one of against an individual member. the Cabinet who resigned a fo night ago.

Corruption Among Chinese

Officials. One of the most hopeful signs regarding China is that of leta the authorities at Peking have been to all appearance, acting rigorongly with reference to certain alleged; cases of corruption. It seems that there is every reston for drastic sotion and that such action has been applied is, as we have stated, eminently satisfactory. Corrupt officals have ever been the bane of China's national existence, and so long as they are able to flourish progress is impossible. The stability of nations rests simost entirely upon the integrity of their officials. Like Cassar's wife they must be above suspicion, otherwise the basis of fidelity that is essential for progressive work between nations as between individuals will be destroyed and with its destruction nothing good can be realised. The charges of corruption against certain Chinese officials recently would seem to indicate that such officials realise but vaguely, if at all, the responsibilities they incur in accepting a Government position for, as we have said and what very evidently it is necessary to point out with considerable emphasis upon them largely depends Ohina's welfare and her position and standing in the eyes of the

Shipping Finance. The report of the directors of the British Empire Steam Navigetion Co., Ltd. (Furness, Withy and Co.), for the year ended April 30, shows a trading profit of £49,902 18s. 7d. After deducting debenture interest, general management and interest charges, maintenance repairs, trustees', directors' and auditors' fees, there remains a balance of £32,367 13s 2d. The directors have written off the sum of £25 000 from flo ation expenses account, leaving an available sum of £7,367 13s, 2d., out of which a dividend to the ordinary share capital is recomm inded at the rate of 10 per cent. per annum. This will absorb £6,790 8s. 3d., leaving £577 4. 1ld. to carry forward to next account. The company's fleet, including vessels building, has a total d. w. carrying capacity of 74.590 tons. The company was formed February 17, 1914. At the annual meeting of the Norwegian Spinowners' As ociation a resolution in favour of estabe lishment of a ship mortgage bank was adopted. The preparatory work, it was stated, had already been begun, so, that the foundation of that bank could take place as soon as the opportune moment arrived. A report was made on the first eight months' working of the State war insurance. During that period the sum of 5,500,000 crowns (\$1,474,000) had been received in premiums and 298,000 crowns (\$79,864) paid out as compensation for damage, leaving a balance of over 2,000,000 crowns (\$526,000) for the settlement of claims that were still under examination or had yet to be reported. Steamer Posted as "Missing at Lloyd's is Heard From.

On December 21, 1914, the steamer Niggem sailed on a voyage from Alexandria to Barcelona with a cargo of cotton. After being seen by the Soldier Prince off Malta, nothing further was heard of her, and on March 4, 1915, she was posted as missing at Lloyd's. Considerable surprise, therefore was caused by the publication of a cable which her owners, Wilson and Reid of Belfast, had received from her captain, which was sent from Sollum, half-way between Derna and Alexandria, on the North African coast. It contains the bare news that the vessel toundered on December 27th, the captain and half the crew of sixteen being saved. It is evident that the survivors of the wreck must have landed on the desert shore and made their way to Sollum. whence they have been able to announce their Eaoch Ardenгеарреагапсе. Ав as can be ascertained, says London "Fairplay," this is the first steamer posted as missing of which definite news has been received after her posting, though similar occurrences have been anown in the case of sailing vessels. August 10, 10.45 p.m. Field Marshal Sir John French states in a bulletin that the gains at Hooge have been consolidated and a German attack easily repulsed. Trade Openings in Russia. H. M. Consulat Batoum reports that, in spite of strong outside competition, few countries offer such scope for the development of certain branches of British trade as does the Caucasus, provided, of course, that efforts are made to fall in with methods of business which, although they may seem novel to British manufacturers and firme, are nevertheless to desply rooted that they have bedifficult to abolish, and are, there-fore, readily accepted b manu-facturers and tradesmen outside the United Kingdom. The Vice-Consulat Novorossisk reports that American manufacturers are making great efforts to capture trade in the Northern Caucas

Early Forecast on Bean Crops. It may be rather early to make a forecast of this year's bean crops in South Manchuria. How ever, judging from the progress, made so far, the growth of the crops north of Mukden is not quite satisfactory, and it is feared that a little decrease in the yield will follow. However, everything depends on how the weather will come out. If favoured with hot and wellregulated weather, there is still a hope of reaping an unexpectedly abundant harvest. Speaking of the region south of Mukden, so long as no unforescen freak of weather overtakes the crops, it is thought unlikely to see the actual returns smaller than last year. North Manchuria, in particular, there is a broad tract bi land left for reclamation for the purpose of growing beans. A similar possibility is by no means lacking in South Manchuris either. But, in order to realize any appreciable incresse in the area of cultivation, the construction of new railway lines is to be awaited.

Russia and Tea Trade. There appears to be some unessiness in the Indian tea trade, gays "The Indiaman. Apart from their difficulties in obtaining wood for the tea-chests and ships to store them in, the merchants are anxious as to the future of their Russian business. The prohibition of vodka led to a strong Russian demand for tea, by which India hoped to profit But the abolition of the vocks monopoly, which the Emperor has pledged his word shall never be revived, is costing the Govern ment over a million sterling week in revenue, and the repor has got abroad that the Russian Treasury is considering the es tablishment of a tea monopoly is its place. The report, thoug plausible, is unconfirmed, and may be doubted whether, after her recent experience, Russi will incline towards the experi ment of another monopoly of staple article of consumption.
